

# INFOSYS ORACLE CLOUD SUITE

## Industry Overview

According to a recent Constellation Research report, the global cloud ERP market will be worth **US \$44.6 billion** annually by 2026, with a Compound Annual Growth Rate (CAGR) of **11.2%**.

Current challenges faced by implementation partners include:

- Unorganized reusable artefacts from other cloud projects
- CoE artifacts maintained across multiple platforms like SharePoint, MS Teams, local drives, etc.
- Lack of awareness about the availability of reusable components
- Effort overrun in cloud programs due to inefficient tools
- Absence of quick-start capability with pre-configured solution sets tailored for the business domain
- Inability to track ongoing process definition enhancements and artefacts based on product changes and best practices
- Need for faster time-to-market for cloud implementations

## Solution Overview

The Infosys Oracle Cloud Suite, created by Infosys Centre for Emerging Technology Solutions (ICETS) in partnership with Infosys Oracle Services, is a cloud-first, digital transformation platform that helps clients accelerate Oracle Cloud implementation by leveraging ready-to-use industry solutions and toolkits.

Our agile adoption framework backed by role-based access control facilitates a guided execution of projects and helps achieve effective collaboration between all stakeholders.

Infosys Oracle Cloud Suite offers:

- Preconfigured ready-to-use industry solutions and accelerator tools
- Guided tour with review-approval workflow
- Role-based dashboard and access that enables practitioners to collaborate with all stakeholders

Infosys Oracle Cloud Suite enables practitioners to complete their respective tasks at speed and avoid duplication of efforts.
